

BLUESHIELD TACTICAL SYSTEMS

Home Defense Certification Course

We realize you have a desire to protect your family and home from intruders that could have horrific intentions, which is why you purchased a firearm. But are you really prepared and well trained for the life threatening encounter? Or are you like many others that have gone through one course on a firing range to get their license? This training brings realistic security tips to you as well as ways to not be a victim of an encounter. We go beyond the firing range and place you the student in life like scenarios where you have the opportunity to learn so much more about home self-defense using not just a firearm, but other available weapons. The average criminal court trial can cost more than \$10,000 in fees that could result in criminal prosecution. This course not only allows you to be able to articulate why you protected yourself, but also shows that you have a specialized training certification beyond just the average citizen. You won't be disappointed after attending this training.
