

# GROUND CONTROL INSTRUCTOR

## LEVEL 2

## \$375

February 5th - 7th, 2024  
McKinney, TX

This is the next series in our Ground Control Instructor curriculum that focuses on being able to control a suspect as a team or individual officer until backup arrives. Many of these techniques and concepts branch off of our first series and are essential for any agency looking to improve its overall program. The techniques from this course work on the street and have been pressure tested with a higher percentage of probability. We teach our award-winning teaching methods in this course that will improve you overall as an instructor. You'll learn various simple takedowns and control positions that will give you a format to teach from that isn't overly complicated with jargon or acronyms that you have to memorize. We focus not only on techniques but on how to interact with your officers and your administration to streamline your program with a balanced and well-thought-out approach. **We do not require you to have attended our first Ground Control Series to attend this program.**
