Ground Control Instructor Level 2 for Law Enforcement

This is the next series in our Ground Control Instructor curriculum that focuses on being able to control a suspect as a team or individual officer until backup arrives. Many of these techniques and concepts branch off of our first series and are essential for any agency looking to improve their overall program. The techniques from this course work on the street and have been pressure tested with a higher percentage of probability. We also teach our award-winning teaching methods in this course that will improve you overall as an instructor. Our trainers have a background both in martial arts and a vast career in law enforcement that allows them to combine the best of both worlds into the program. You'll receive an illustrated instruction manual when you attend this course that will make it easier for you to teach from once you leave the program. Our goal is to see you succeed and save lives through the information we provide. We look forward to seeing you at the course.
