**June 4th- 5th
Florence, AL**

The objective of this high-speed solo engagement tactics course is to show officers how to respond efficiently and effectively to an active shooter. This course stresses offense rather than defense. This course consists of solo tactics for movement and entry and force-on-force training utilizing either marking cartridges (such as Simmunition) or Air Soft. Officers will have an understanding of how humans process information and how to use that information to their advantage. They will learn how to properly use cover/concealment, speed, surprise, and aggressiveness to overwhelm the suspect. Officers will learn how to engage in multiple deadly force threats by themselves.

Course Content

- awareness and mental preparedness
- psychological and physiological effects of a violent encounter
- history of active shooters
- blood control in a combat setting
- static and dynamic movements
